*Customizable

The Powered Roller CarryMatic Station, normally a CDLR type conveyor station, performs automated material transfers with CarryMatic carts and with other Powered Conveyor Sections, within a CarryMatic System. Stations are equipped HMI control panels with E-Stop, load present sensors, and cart alignment sensors. Guards and additional E-Stop positions are also available. These stations can be used for both loads and unload transfer to and from the CarryMatic carts.

Features:

- 30 FPM Standard Transfer Speed (customizable)
- Emergency Stop Buttons
- Turn-Key System
- 240/480 VAC Motor
